HLT 145 Ethics for Health Care Personnel

Course Outcomes

At the completion of this course, the student should be able to:

- Review central moral, philosophical, and social problems in medicine and health policy;
- reflect on the physician's responsibilities in helping to develop and implement social policies regarding health care delivery;
- develop critical skills for evaluating and articulating moral and philosophical claims, arguments, and goals frequently found in practice and medical literature;
- formulate, present, and defend a particular position on a moral or policy issue in health care and to be able to communicate these ideas and conclusions effectively, both orally and in writing, to patients, patients' families, colleagues and other decision makers in society, and
- reflect on the relationships among moral, professional, and legal obligations of physicians, including those involving honesty, and respect for patient well-being, autonomy, dignity and confidentiality.
