

Virginia Western Community College

NSG 270

Nursing Capstone

Semester 4

Prerequisites: NSG 210: Health Care Concepts I; NSG 211: Health Care Concepts II, Nursing Elective

Co-requisites: NSG 230: Advanced Professional Nursing Concepts; NSG 252: Nursing Complex Health Concepts

Pre/Co-requisite: PHI 220: Ethics

Course Description

Provides students with the opportunity to comprehensively apply and integrate learned concepts from previous nursing courses into a capstone experience. Emphasizes the mastery of patient-centered care, safety, nursing judgment, professional behaviors, informatics, quality improvement, and collaboration in the achievement of optimal outcomes of care. Provides supervised learning experiences in faculty and/or preceptor-guided college nursing laboratories, clinical/community settings, and/or simulated environments.

Laboratory 12 hours. Total 12 hours per week.

Semester Credits: 4

Lecture Hours: 0

Lab/Clinical/Internship Hours: 12

Required Materials

1. CoursePoint for Concepts 6 book library year 2 – ISBN: 9781975115753
2. vSim for Maternity/Pediatrics. Lippincott - ISBN: 9781975197841
3. Kaplan

iHuman Virtual Simulation package

Course Student Learning Outcomes

Upon completing the course, the student will be able to:

1. Provide patient-centered care promoting therapeutic relationships, caring behaviors, and self-determination across the lifespan for diverse populations.
2. Practice safe nursing care that minimizes risk of harm across systems and client populations.
3. Demonstrate nursing judgment through the use of clinical reasoning, the nursing process, and evidence-based practice in the provision of safe, quality care for clients.
4. Practice professional behaviors that encompass the legal/ethical framework while incorporating self-reflection, leadership and a commitment to recognize the value of life-long learning.
5. Manage client care through quality improvement processes, information technology, and fiscal responsibility to meet client needs and support organizational outcomes.
6. Demonstrate principles of collaborative practice within the nursing and interdisciplinary teams fostering mutual respect and shared decision-making to achieve optimal outcomes of care.

Topical Description**Major topics to be included:**

1. Management of Patient-Centered Care Concepts
 - Patient advocacy, respect and caring
 - Development of a patient centered plan of care
 - Time management and workload organization
 - Incorporation of evidence-based practices and technology in patient care
 - Use of therapeutic communication skills
2. Safety Concepts
 - Safety and Infection Control implementation in patient care
 - Incorporation of safety principles
 - Use of safety enhancing technologies
 - Incorporation of National Patient Safety Goals
3. Nursing Judgment Concepts
 - Develop an individualized plan of care based on patient values, clinical expertise and reliable evidence
 - Recognize changes in patient status and intervene appropriately
 - Apply the nursing process to guide care
 - Prioritize patient care accurately using relevant data and best evidence.
 - Incorporate and value evidence-based practice, evaluate existing practices and seek creative approaches to problem solving
4. Professionalism Concepts
 - Ethical and Legal Issues in patient care
 - Responsibility and accountability for delivering safe patient care
 - Professional demeanor in interactions with patients, families and healthcare providers.
 - Reflective thinking for the purpose of improving nursing practice.
 - Initiating a plan for ongoing professional development
5. Informatics and Quality Improvement Concepts
 - Common quality measures encountered in clinical practice
 - Technology and information management tools to support safe, patient care.
 - Fiscal responsibility in the delivery of patient care
6. Teamwork and Collaboration Concepts
 - The effect nursing and other interdisciplinary team members have upon care processes and outcomes for patients and families within any healthcare setting
 - Collaboration with members of the healthcare team
 - Appreciation of different communication styles and cultural differences in team members.
 - Management skills and principles of delegation
 - Identification of own strengths and weaknesses to improve individual as well as team performance
