**Course Outcomes**

**At the completion of this course, the student should be able to:**

- **SAFETY:** Provide patient-centered care at a basic level in long-term care, rehabilitation and acute facilities.
- **Critical Thinking:** Apply critical thinking skills to plan for meeting the basic human needs of patients.
- **Informatics:** Demonstrate appropriate communication with patients, families, and the interdisciplinary healthcare team in terms of verbal communication and electronic documentation.

- **Culture:** Demonstrate practice within the profession's ethical and legal framework while upholding an understanding of patients' culture, ethnicity, and spirituality.
- **Patient centered care:** Apply theory in managing patient centered care of the individual in clinical performance.
- **Evidence-based practice:** Incorporate the best current evidence to provide practice for minor alterations in safety, comfort, nutrition, and elimination using the nursing process.
- **Teamwork:** Participant in a working healthcare team using appropriate forms of communication.
